Spectrum Management and Telecommunications

Please keep cell towers as far away from people as possible! They are a danger! Thanks! Brad.

Facilitated by Canadians for Safe Technology
We request that the distance around a tower that requires notification as per section 5.2 (Public Consultation Process) be increased from 3 times the tower height, to 10 times.

Rationale for Request: Some of the highest exposures and health effects can be experienced up to 500m from the tower, depending on the angle of the antennas. Requiring notification only 3 times the tower height would exclude telecommunication proponents from having to individually notify residents that could be most affected by the installation or modification to existing structures.
