Re: New Regulations Proposed to CPC 2-0-03

As homeowners and citizens of Canada, we are very concerned with the possibility that Industry Canada might ignore some very important points in the pending approval of new regulations around CPC 2-0-03. We would ask that in the interest of public health you consider the following when making your decisions.

- we request the inclusion of non-tower structures (building-mount, roof-top, hydro-pole, utility pole, etc...) installations be included in the notification and consultation process
- we request that changes and or modifications to existing towers/antennas in place that would raise the RF output of the structure by more than 25%, be included in the notification and consultation process
- we request that the distance around a tower that requires notification as per section 5.2 (Public Consultation Process) be increased from 3 times the tower height, to 10 times

It seems that the unintended consequence of the new regulation might be to allow more antennae in closer proximity and if so, we are truly defeating the purpose of the update to CPC 2-0-03.

Thank you

Barb Yates & Joe Larizza
