RE: ROGERS CANTEL INC. APPLICATION FOR 2500 MHz MCS SPECTRUM

Dear Mr Skora:

I am writing to express my support for the above noted application, which includes a detailed Learning Plan.

The broad initiatives described in the application include provision of both high-speed Internet access as well as local telephone service at very competitive rates. These services will connect more Canadians to the information highway and will provide local competitive rates to families and small businesses who have had little or no choice of local service providers.

As well, residents and businesses will benefit from Cantel's proposed MCS system and Cantel’s Learning Plan and the Cantel Learning Fund will benefit the educational sector by providing needed resources and by connecting schools and students alike.

Sincerely,

Katie Mahoney
Councillor Ward 8
